

Response Goal

To assist vulnerable children and their families to mitigate the transmission and impact of COVID-19 in their communities.

Our Objective:

- Children and their families have the knowledge and resources to practice COVID-19 preventative measures
- Support health services to screen, refer and treat children and their families impacted by COVID-19
- COVID-19 affected families (particularly children and women) have improved access to information, reporting and referral services which protect them from violence.
- COVID-19 affected children and their families have improved resilience to sustain their livelihoods and means of income generation.
- COVID-19 affected children and their families are supported with supplementary education services

Target Beneficiaries:

71,000 Households (HHs)

500,000 Individuals

355,000 Children

145,000 Adults

21 Health Institutions

1,000 Doctors

Response Timeline

Start
March 24
2020

Phase 1
Prevention

Phase 2
Response

Phase 3
Recovery

End
September
30, 2020

What we achieved from May to July:

92,944 people were assisted in three provinces of Afghanistan: Herat, Badghis and Ghor

60,887 Adults
(39,177 Women, 21,710 Men)

55,955 People reached
with preventative behavior messaging

32,057 Children
(17,283 Girls, 14,774 Boys)

10 Health Facilities Supported

459 Trained faith leaders
disseminating preventive measures for COVID-19

470 Medical staff provided with PPE in Health Facilities

25,642 Surgical Masks (including to health facilities, health workers, and caregivers)

4,050 Non-sterile Gloves (including to health facilities, health workers, and caregivers)

29,635 community individuals (incl. caregivers) provided with COVID-19 preventive materials

3 of quarantine (e.g. triage areas) or isolation spaces supported-rehabilitated/set up

204 cleaning kits distributed to vulnerable communities

35,523 comprehensive hygiene kits distributed

46,855 Information, education and communication Materials printed and distributed

1,090 Community health workers trained or supported to provide community-based services

Post Distribution Monitoring (PDM) Findings:

- 99% of beneficiaries are satisfied with the quality and 92% of beneficiaries are satisfied with the quantity of hygiene kits.
- 95% of beneficiaries reported that they spent half of the cash assistance on food, the rest is spent on health, paying the rent and debt repayment.
- 100% of the beneficiaries reported that as a result of the cash assistance, they are less likely to marry their daughter at early age.
- 100% of the beneficiaries reported that as a result of the cash assistance they are less likely to send their children to work.
- As per beneficiaries, unconditional cash assistance is the most preferred assistance during the emergency.
