*World Vision Foundation of Thailand (WVFT), as a Christian humanitarian and development organization, is making all efforts to mitigate the impact of disasters to the people affected, especially the children and their families.*

## KEY INTERVENTIONS

### Comprehensive school safety framework

Ensure school safety by establishing safe learning facilities, school disaster management, and risk reduction and resilience education

#### Outcome to date:

A national baseline survey on school safety has been conducted in partnership with the Ministry of Education – Office of the Basic Education Commission. The process of data collection and analysis involved all members of Thailand Safe School Network and was led by World Vision Foundation of Thailand.

*“The school is a safe zone to seek refuge in when disasters strike. If there is a case of a disaster now amid the COVID-19 outbreak, we must remember to wear cloth masks because we still need to prevent the COVID-19 outbreak”, the members of the ‘Threat’ group presents the map that shows risk spots and safe zones within the community in case of disasters.*

*Students who are members of the ‘Let it be’ group present the map that shows risk spots and safe zones within the community in case of disasters. They emphasise how to stay safe from COVID-19: “Don’t forget your masks, wash hands with soap water, and keep social distancing”.*

*Students are brainstorming, thinking about examples of events in their community, and gathering information to build knowledge of the COVID-19 outbreak and community-based disaster prevention.*
